

# MY PROJECT ESTIMATOR QUOTE SYSTEM

## "TRADITIONAL ESTIMATING FORMAT" WITH A LOT OF HELP FROM TECHNOLOGY

My Project Estimator is a spreadsheet program that allows you to enter basic project information into a spread sheet. From this information the program will calculate and input the results to an Estimate Sheet. My program is designed to enhance traditional estimating by using technology to help with the calculating but preserve the flexibility that traditional estimating provides.

It is **user friendly** with very little set up to get started. [This is the program that I use every day.](#)

**My Project Estimator can be customized** such that additional information can input to meet the needs of your business. In addition, the program acts like a checklist, ensuring that essential items are not disregarded **plus it is a good way to double check your own work to avoid errors.**

Unlike other estimating programs your current staff with little or no estimating experience can enter the basic information. The program can also act like a teacher when the time comes to train new estimators. The program is like a master checklist.

### It's almost like having another estimator on staff!

The end result is accurate quotes and faster turn around time, thus freeing up your time to do more of the things that will bring more profit to the bottom line and allow more time for customer service!

[Put my estimating program \(and my 40 plus years experience\) to work for you!](#)

#### **Full package to include the following estimators:**

- 1 **HOUSE** automatically figures **-8-siding -7-roofing and 7-millwork options**
  - A) **I.C.F FOUNDATION (NEW)** - includes concrete calculations
  - B) **A.W.W.F.FOUNDATION (NEW)**
- 2 **POST FRAME** automatically figures -liner option - **4 framing options**
- 3 **GARAGE** automatically figures **-8-siding -7-roofing and 3-liner options**
- 4 **ROOFING** automatically figures **-4-roofing options**
